Nothing like "bringing the salad into the kitchen," quipped judge Allegretti, referring to the placement of custom windows that gives this kitchen an unfettered view of lush outdoor vegetation as well as abundant natural light. The room has a functional U-shape, ample soapstone countertops, custom cabinetry, and two sinks. The Italian backsplash tiles over the oven and the groove beaded board ceiling counter the more modern white cabinetry and stainless steel and nickel detailing, resulting in a warm, functional space.—C.O.

The Westlake and Wellness Center is a great example of a planned community. The building is a prime example of the Westlake Companies' commitment to providing a high-quality, well-planned, well-designed, and well-maintained environment for its residents. The building's design, construction, and operation are all of the highest quality.
